Customer Reviews

This book is informative and easily read. I used it with my second language learners to support the earth science unit I was teaching in 4th grade. The photos and illustrations are excellent. It is well organized, and exciting. It is an Accelerated Reader book so the students can take a vocabulary test and a comprehension test on line to demonstrate what they learned and to win points. Even my most recent immigrants could read it and earn their 0.5 points in comprehension. Good book!!

I think that this is a good book and I know that this is a good book. The part I like about it is when the volcano erupts. The part I don't like about it is when people died. I would recommend this to a 4th grade reader and I would have preferred for it to have more pages. I give it a 5 stars because it has

nice pictures and I learned new information about volcanoes.

I am a private tutor and always look for interesting as well as informative books for my youngest readers. This is an excellent book to use with competent young readers as well as older students who may find reading difficult.

This book is great to use in a center when teaching a unit on landforms and is also great for those kids who are aching to know more about the science realm of volcanoes. It's age appropriate and children at the Step 4 reading level will be challenged enough with it. :)

These are great books for children learning to read and for children who don't like to read "long: books. Also these books have a ton of information in them that keep my children interested on reading to the next page. I find that my children will read these books over and over again.

This is great -- the science of volcanoes is explained, with wonderful graphics and a very straightforward text. The words are hard but not too hard. The subject matter can be scary for little ones, but this book makes volcanoes plain and simple. And INTERESTING. My little first-grade scientist has read this many times.

My 5 yr old reads this by himself. It has details that are not too complicated for him to understand. He tells me what he read without getting overwhelmed with information. Recommended reading for 5-8 yr olds

I love the whole Step into Reading series. The information is excellent and they are entertaining. The lower levels are long enough that a beginning reader gets a challenge but isn't overwhelmed with length. Level 4 is good for a confident reader, even if they still struggle with sounding words out. Reading comprehension really begins to get exercised at this level.
